The Indian Society of International Law

V.K. Krishna Menon Bhawan, 9, Bhagwan Dass Road,
New Delhi 110001

Introduction

The Indian Society of International Law (ISIL), a premier national institution for teaching, research and promotion of international law, was established in 1959, primarily due to the efforts of the late V.K. Krishna Menon. It has indeed been a long and fulfilling journey for the ISIL that it has earned a pride of place among the community of international lawyers throughout the world. This would not have been possible but for the hard work put in by people, such as Judge Nagendra Singh, Dr. K. Krishna Rao, Shri G.S. Pathak, Justice R.S. Pathak, Prof. Harnam Singh, Prof. C.J. Chacko, Shri. K. Narayana Rao, Dr. Anand Prakash, Prof. B.S.N. Murti, Shri C.V.L. Narayan, Prof. M.K. Nawaz, Shri G.V.G. Krishnamurthy, Shri Ram Niwas Mirdha, Prof. R.P. Anand, Prof. Rahmatullah Khan, Dr. P. Chandrasekhara Rao, Dr. S.P. Jagota, Dr. R.K. Dixit, Dr. P. Sreenivasa Rao and a host of others.

The objectives of the ISIL inter alia are:

- To foster nation-wide, the study and development of international law;
- To interpret through its forums and publications, the application of international law as chiefly affecting India;
- To encourage the comparative study of the application of international law in other states; and
- To promote research in international law.

In sixty-six years of its existence, the ISIL, under the dynamic leadership and guidance of distinguished persons, has grown into a prestigious research and teaching centre of international law in India. At present it enjoys the able stewardship of its President Prof. (Dr.) Manoj Kumar Sinha.

In its endeavour to disseminate international law, the ISIL has traditionally received the whole-hearted support and cooperation from the various Ministries, particularly External Affairs, Finance, and Environment and Forests, of the Government of India. The ISIL has benefited from the guidance and support of many judges - present and former - of the Supreme Court of India and Delhi High Court.

The ISIL is housed at V.K. Krishna Menon Bhawan, 9, Bhagwan Dass Road, opposite to the Supreme Court of India. It has two in-house air-conditioned conference halls with a seating capacity of 80 and 100 respectively, a full-fledged air-conditioned auditorium of 250 seats for organising seminars/conferences and symposiums, a number of class rooms, office spaces, etc.

INTERNATIONAL TRADE AND BUSINESS LAW

INTRODUCTION

Since the 1980s, liberalization of national economies has led to unprecedented growth in international trade and cross-border economic transactions. The establishment of the World Trade Organization (WTO) in 1995 created a unified global legal framework for international trade. However, with rapid technological advancements and evolving global challenges, international trade law has undergone significant reforms.

This course provides a comprehensive understanding of the legal framework governing international trade transactions, addressing recent developments such as digital trade, data governance, sustainability in trade, investment arbitration, and trade security concerns.

INTERNATIONAL ENVIRONMENTAL LAW AND CLIMATE CHANGE

Introduction

The Indian Society of International Law launched PG Diploma Course in International Environmental Law from 2010. The paper consists of four papers. Each paper carries hundred marks which is divided into 70 and 30 marks for written and assignment respectively. The course structure gives a comprehensive understanding of International Environmental issues with special focus on Climate Change. The areas of environmental law and climate change in the context of globalization are evolving which would require up-dating of syllabus. The admission process gets underway in the month of July/August. For the Post-Graduate Diploma and Certificate Courses, the requirement is a Bachelor's degree from a recognized University. A degree in law/science/commerce/business management is desirable for students interested in pursuing the course in International Environmental Law and Climate Change. The Academy reserves the right to relax this requirement if it is satisfied that the practical professional experience of the applicant is adequate to make up this eligibility requirement.

CERTIFICATE COURSE

Space Laws: Policies and Practice

Space has emerged both as an arena of intensifying inter-state competition and as a domain where private establishments play an increasingly important role in shaping conflict dynamics and outcomes. At the same time, the increasing reliance on interconnected space-based systems and infrastructure has introduced new vulnerabilities that can be exploited to disrupt. In addition to providing background information on Outer Space, this course is intended to enhance knowledge of students in space law treaties, soft law instruments, and national legislation. Today, space assets are considered important to national security. The states are developing anti-satellite weapons and other space-based weapons to help secure their interests. This course will also provide an overview of militarization and weaponization of outer space.

Module 1: Foundation of International Law and Space Law

- Introduction to international law concepts relevant to space activities.
- Historical development of space law.
- The distinction between air law and space law.
- Fundamental principles embodied in the Outer Space Treaty.

Module 2: The International Space Law Framework

- Detailed analysis of the five major space treaties.
- UN General Assembly resolution, UN Principles and other soft law instruments on outer space.
- Role of international organisations in space governance (UNCOPUOS, ITU, Conference on Disarmament etc)

Module 3: Contemporary Challenges in Space Law

- Space Resource Utilization
- Commercial use of outer space and privatization: legal challenges
- Space activities and IPR Issues
- Space debris mitigation and remediation
- Long-term sustainability of space activities

Module 4: Militarization and Weaponization of Space

- Militarization of Space and Concept of ‘Weapon’ in Outer Space
- Space Warfare and Laws of War
- Space Weapon Technologie/capabilities
- International law and targeting “Dual-Use” space assets
- Emerging Role of AI in Space Warfare:
- Lawfare in Outer Space
- Recent developments in Soft-Laws for Outer Space Operations

Module 5: India’s Approach to Space Law

- ISRO’s history and achievements
- India’s participation in international space law instruments
- National Space Policy and current regulatory framework
- Efforts to bring out a comprehensive space legislation
- Comparative analysis with other spacefaring nation’s legislation

This structure provides a logical progression from foundational concepts to specialised topics, culminating in the Indian context. The inclusion of India-Specific content makes this course particularly valuable in the national context, addressing a gap in current space law education. By balancing international principles with domestic application, graduates will be well equipped to contribute meaningfully to our growing space sector. This course has potential to significantly contribute to building space law capacity in India, which is increasingly important as the country expands its space activities and update its regulatory framework.

INDIAN SOCIETY OF INTERNATIONAL LAW: LIBRARY

*An Exceptional Resource Centre for International Law
